

ABOUT US

- Establishment year :1974
- PVC production in Tabriz and Qazvin Factory
- Aluminum wire rod production in diameters of 9.5mm and 12mm
- Copper wire rod production in diameters of 8mm with UPCAST technology, belt and copper tube
- First factory in Iran with possibility of making raw materials in cable and wire industries
- With confirmation of Tavanir organization for manufactured products
- Our ISO certificates : ISO 9001, ISO 14001, ISO 45001
- Our qualification approval for laboratory: ISO /IEC17025, 2017, ISO /IEC2017 for first time in Iran's cable and wire industry
- Reference and reliable laboratory from ministry of energy and INSO in Iran
- Formal merged with DIAMOND HADI BARGH CO.
- Certificate of organizational excellence in four star level
- First production of Aerial Bundled cables and Aluminum Air conductors ACSR, AAC in Iran
- Sample exporter since 2019 for (Iraq ,Turkey , Afghanistan , Armenia , Georgia , Africa , Azerbaijan , Eurasia)
- Part of the Approved Vendor list in copper and Aluminum cables for Iraq ministry of electricity
- Part of the Approved Vendor list for oil and gas industries and petrochemical in Iran
- The most outstanding company in wire and cable industry in terms of the variety of products
- The first supplier of Aluminium wire rod and copper products in Iran Mercantile Exchange
- Solar wire and cable production

Fields of activity and major customers

- Power transmission and distribution (All electricity distribution companies in Iran,...)
- Power plants and power substations (Tehran and Tabriz Thermal Powerstations)
- Rail transportation industries (Rail way operation companies) subways (Tabriz ,Mashhad , Qom ,Tehran)
Air ports (Kish, Tehran, Ahvaz, Tabriz) Automobile companies (pars khodro , Bahman diesel , SAIPA , IranTractor manufacturing company,...)
- Oil and Gas industries and petrochemical
(Bandar Imam petrochemical company , Iranian offshore Oil company , Marun petrochemical complex , Damavand petrochemical , shahzand Arak , pars jonoubi jam , national Iranian south oil fields company,...)
- Industrial and infrastructural projects
Steel companies (Isfahan moburakeh steel company , Hormozgan , khuzestan , Foolad Bonab , Zafar , Amin , Kaveh , Miyaneh) other companies (Azar glass Indusry , sahand Industrial Group , Sahanad flout , jemco , Shirin Asal , Tabriz tile group, Tabriz machinery Manufacturing company , pharmaceutical companies , Aras tarla Amin , Zam Zam ,...)
- university of medical science and educational institutions
khatam Al-Anbiya Hospital , ImamReza Hospital , children's Hospital , Urmia Hospital and other hospitals in East Azerbaijan Province and Student dormitories in Iran.
- Aluminum and copper wire rod supplier for big wire and cable companies
(Abhar , simco , shahid Ghandi , Shahabjam , Yazd wire and cable , Damghan wire and cable , Mehr Asl semnan , sina cable,...)
- construction projects
(Anboush sazan , Roads and Urban Development , Housing charity , Housing Development company , MCI , Imamkhomeini Mosalla , Islamic seminary,...)

Halogen free wires
and cables

Copper and Aluminum
power cables

and cables

Solar wires
and cables

Telecommunication
and coaxial cables

Shielded cables

Armoured cables

Tinned wires
and cables

Automobile Wires

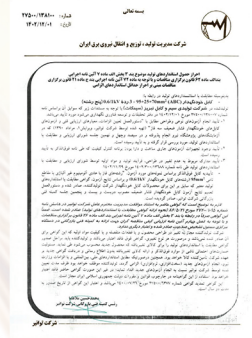

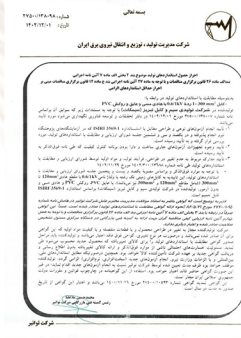

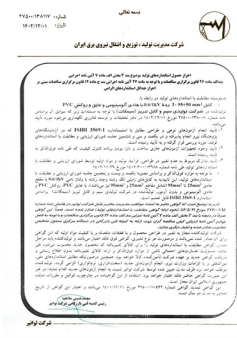

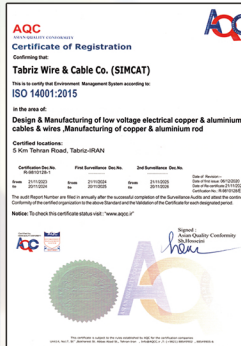

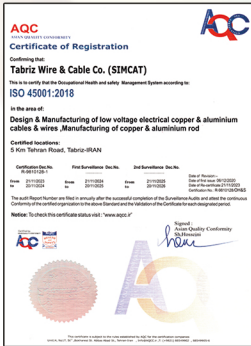

Instrumentation
cables

Air conductors
AAC, ACSR

Part of the certificates and approvals

Producer of various raw materials for the wire and cable industry

Aluminum wire rod production unit:

The Aluminum wire rod production unit was launched in 1996 using the latest equipment with an annual capacity of 12000 tons, which has the ability to produce all kinds of Aluminum alloy and wire rods in diameters of 9.5(mm) and 12 (mm) and all kinds of grades required by the electrical and steel industries in the country and provides part of the needs of neighboring countries

copper wire rod,tube and belt production unit:

The products of this unit ,which are produced by continuous casting method, include wire rod with a diameter of 8(mm) , especially for wire and cable industries and with a diameter of 20(mm) and 30 (mm) ,it is suitable for continuous extrusion industries and all kinds of belts and copper tubes. The copper wire rod produced in this unit has the ability to be stretched to a diameter of five hundredths of a millimeter due to being free of oxygen and not having a copper oxide layer on its surface , which is not possible to achieve such results in other production methods.

Granule production unit:

In 1986 , PVC granule production hall started In Tabriz factory . The machines of this unit are from WERNER FLAGER , Germany , and have the ability to produce all kinds of polymer granules used in various industries , especially the wire and cable industry.
